Study Description: The goal of this data set was to describe birth statistics in the city of Baltimore, Maryland in 2010. This contains preterm births, birth weight, and certain municipalities within Maryland.

We prepared the data as five comma-delimited, plain text files. The file,

- The_geom: coordinates of the municipalities
- Csa: city name
- Termbir10: birth term
- Brthwt10: birth weight
- Prenatal10: prenatal birth
- Teenbir10: teen births
- Leadtest10: lead tests
